ADVENTURE GRIDS

LETTER SIZE EDITION

Geo-Centric Designs

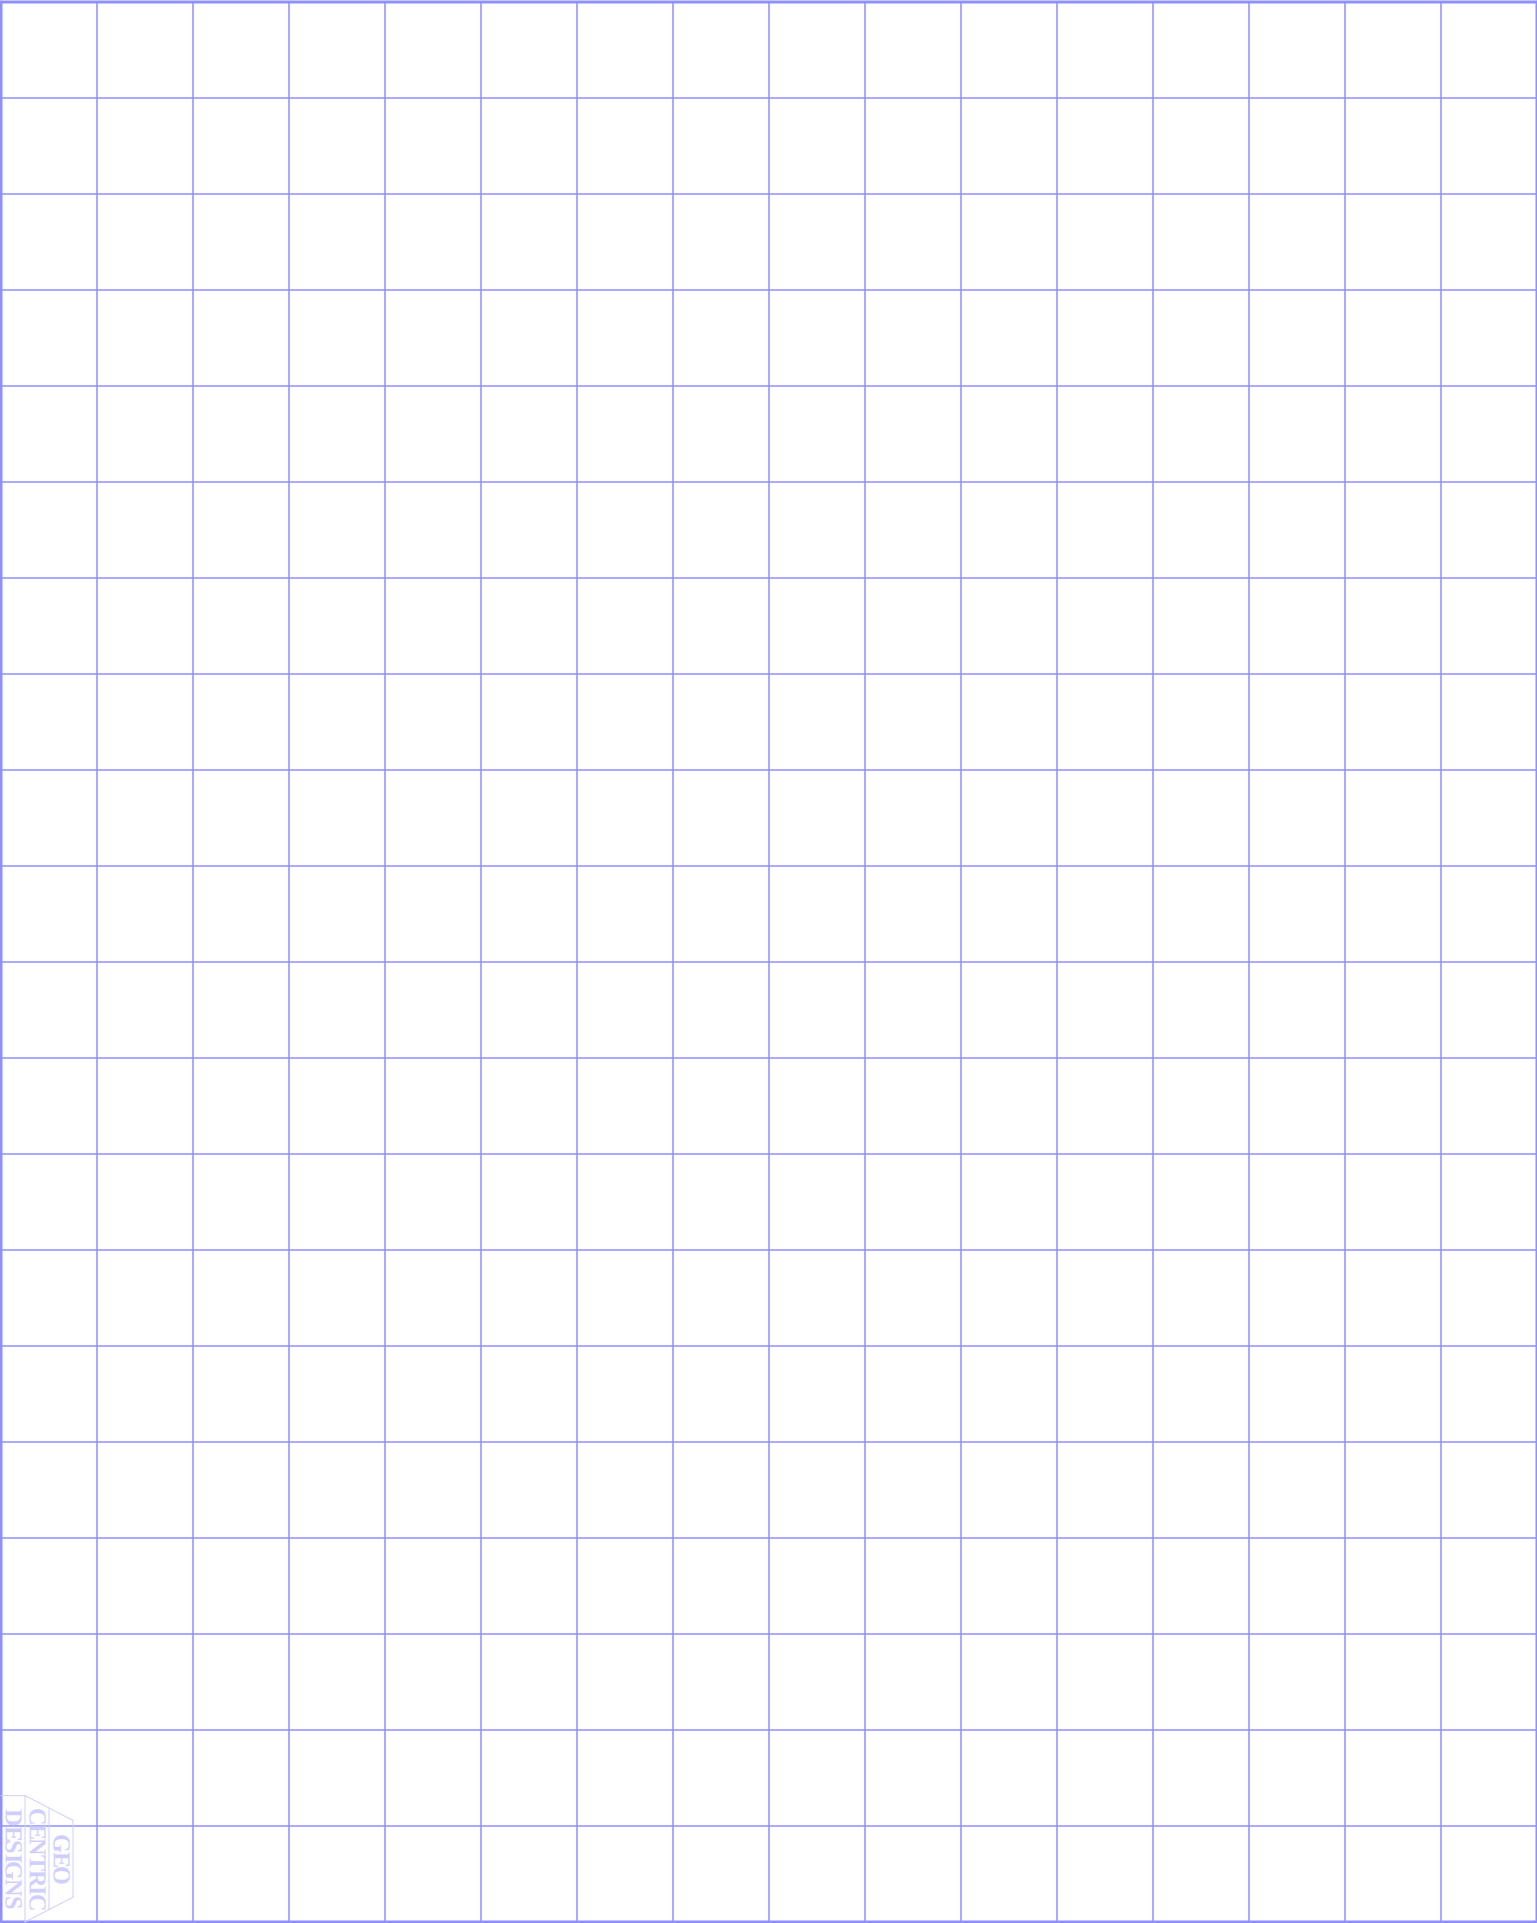

2012

Here are 16 pages of letter size grids for your gaming use. Why spend money on pads of grids that have lines so thick that pencils are useless on them? The thin blue lines are perfect for any writing device. Don't like color? Print in gray scale for the same results.

Included are square, hex, and 3d style grids at sizes of 1", 1/2", 1/4", and 1/8". The hex grids have pages for each orientation as well.

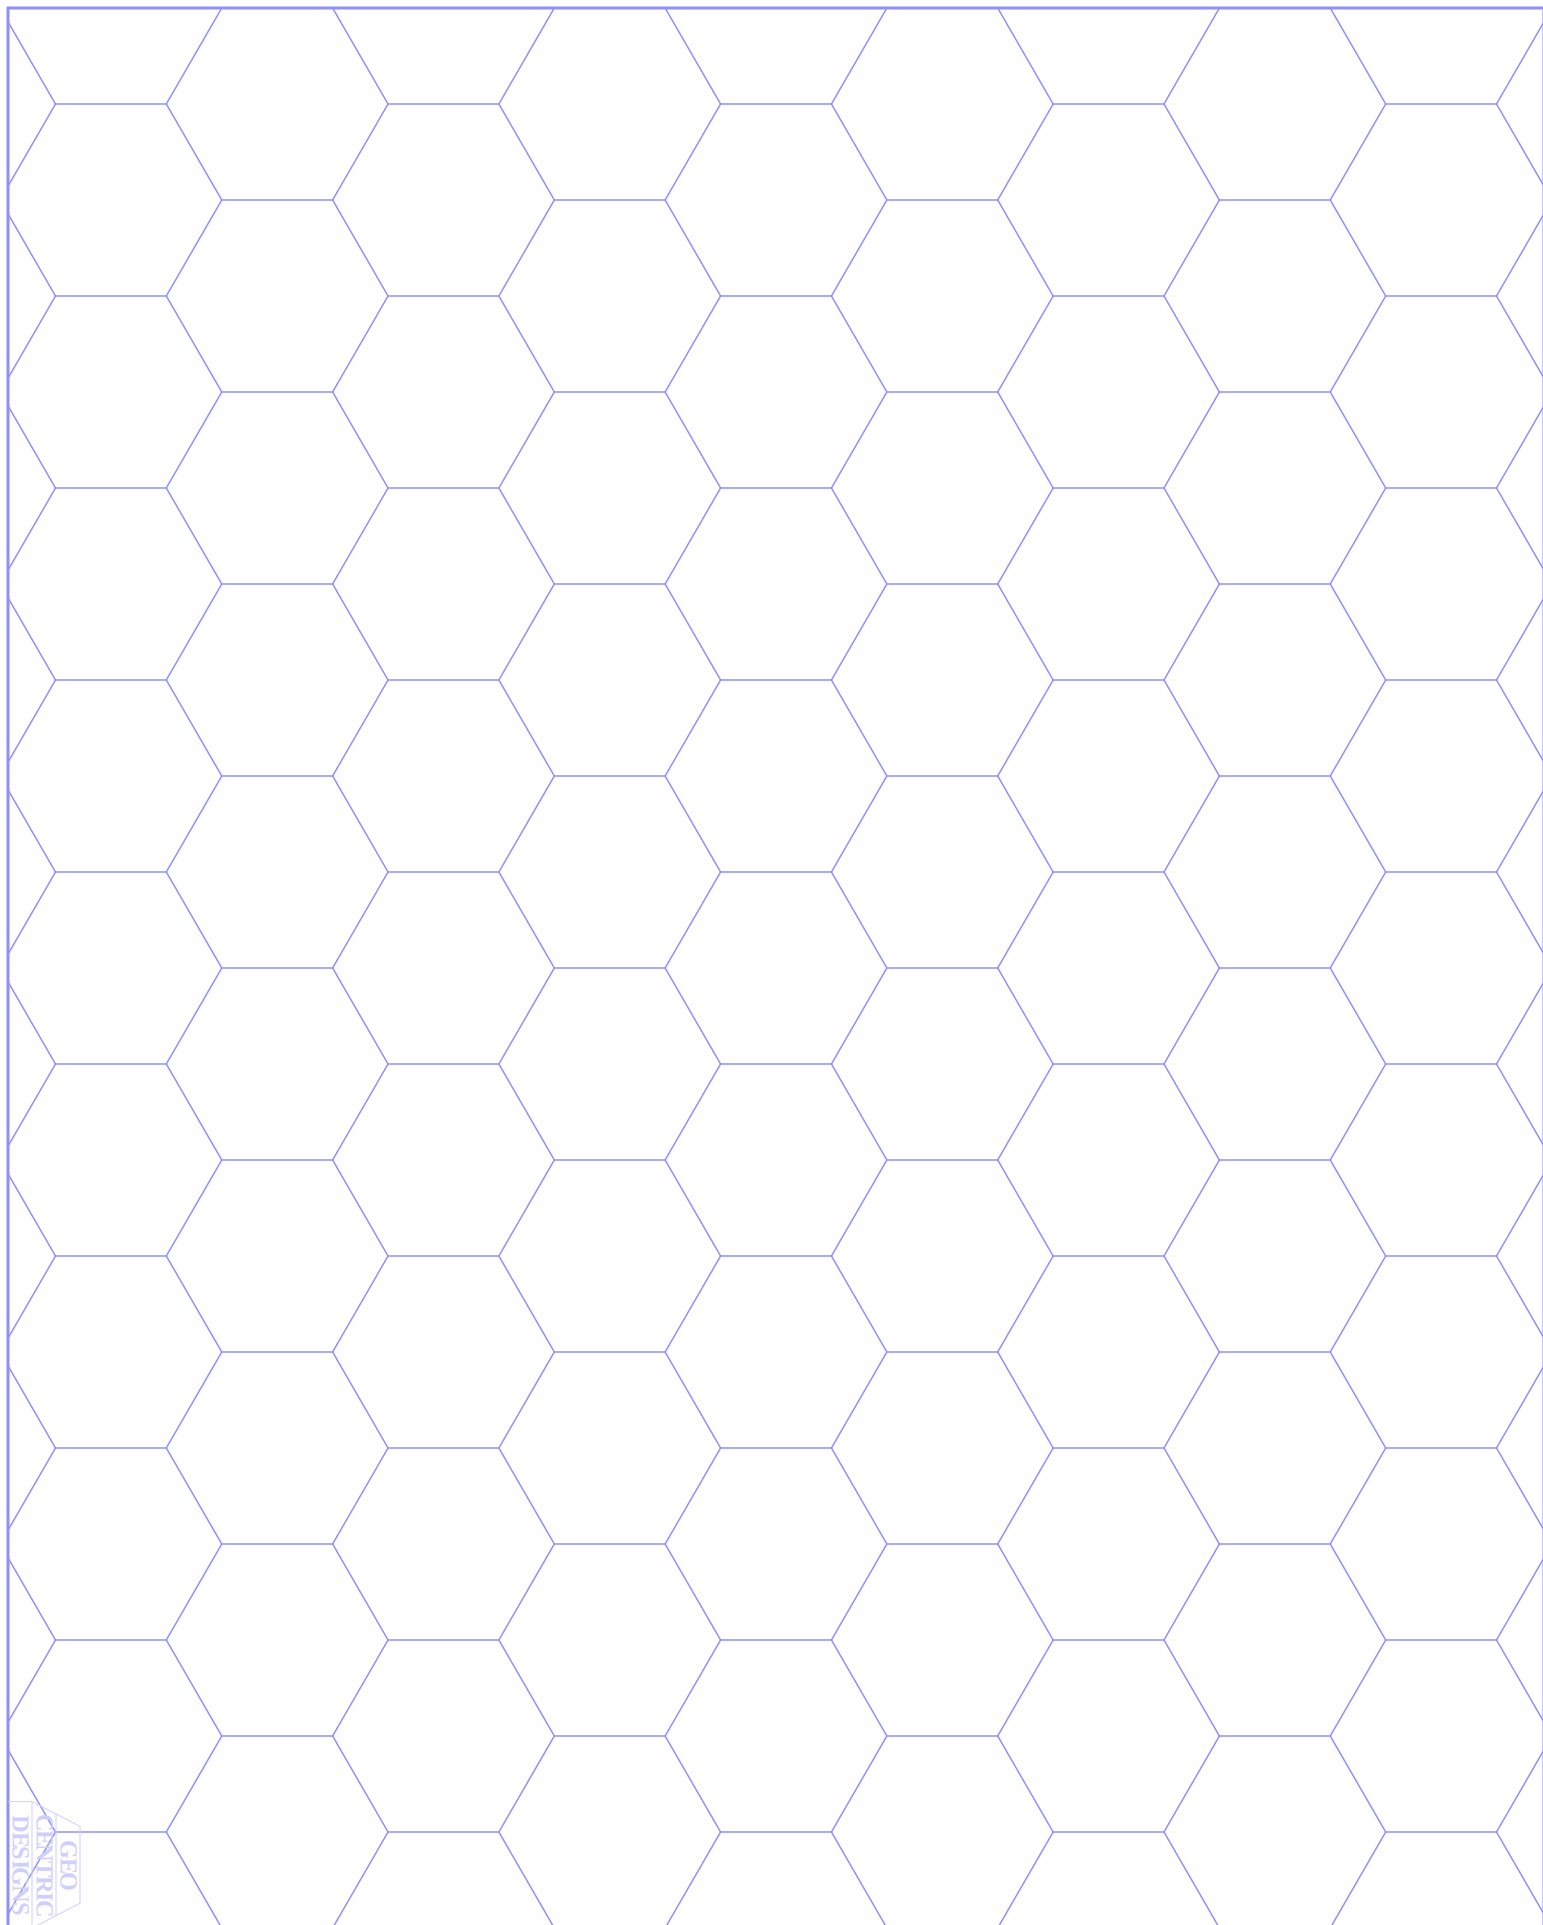

Note: when printing, set scale to "none" to ensure the grid sizes are accurate.

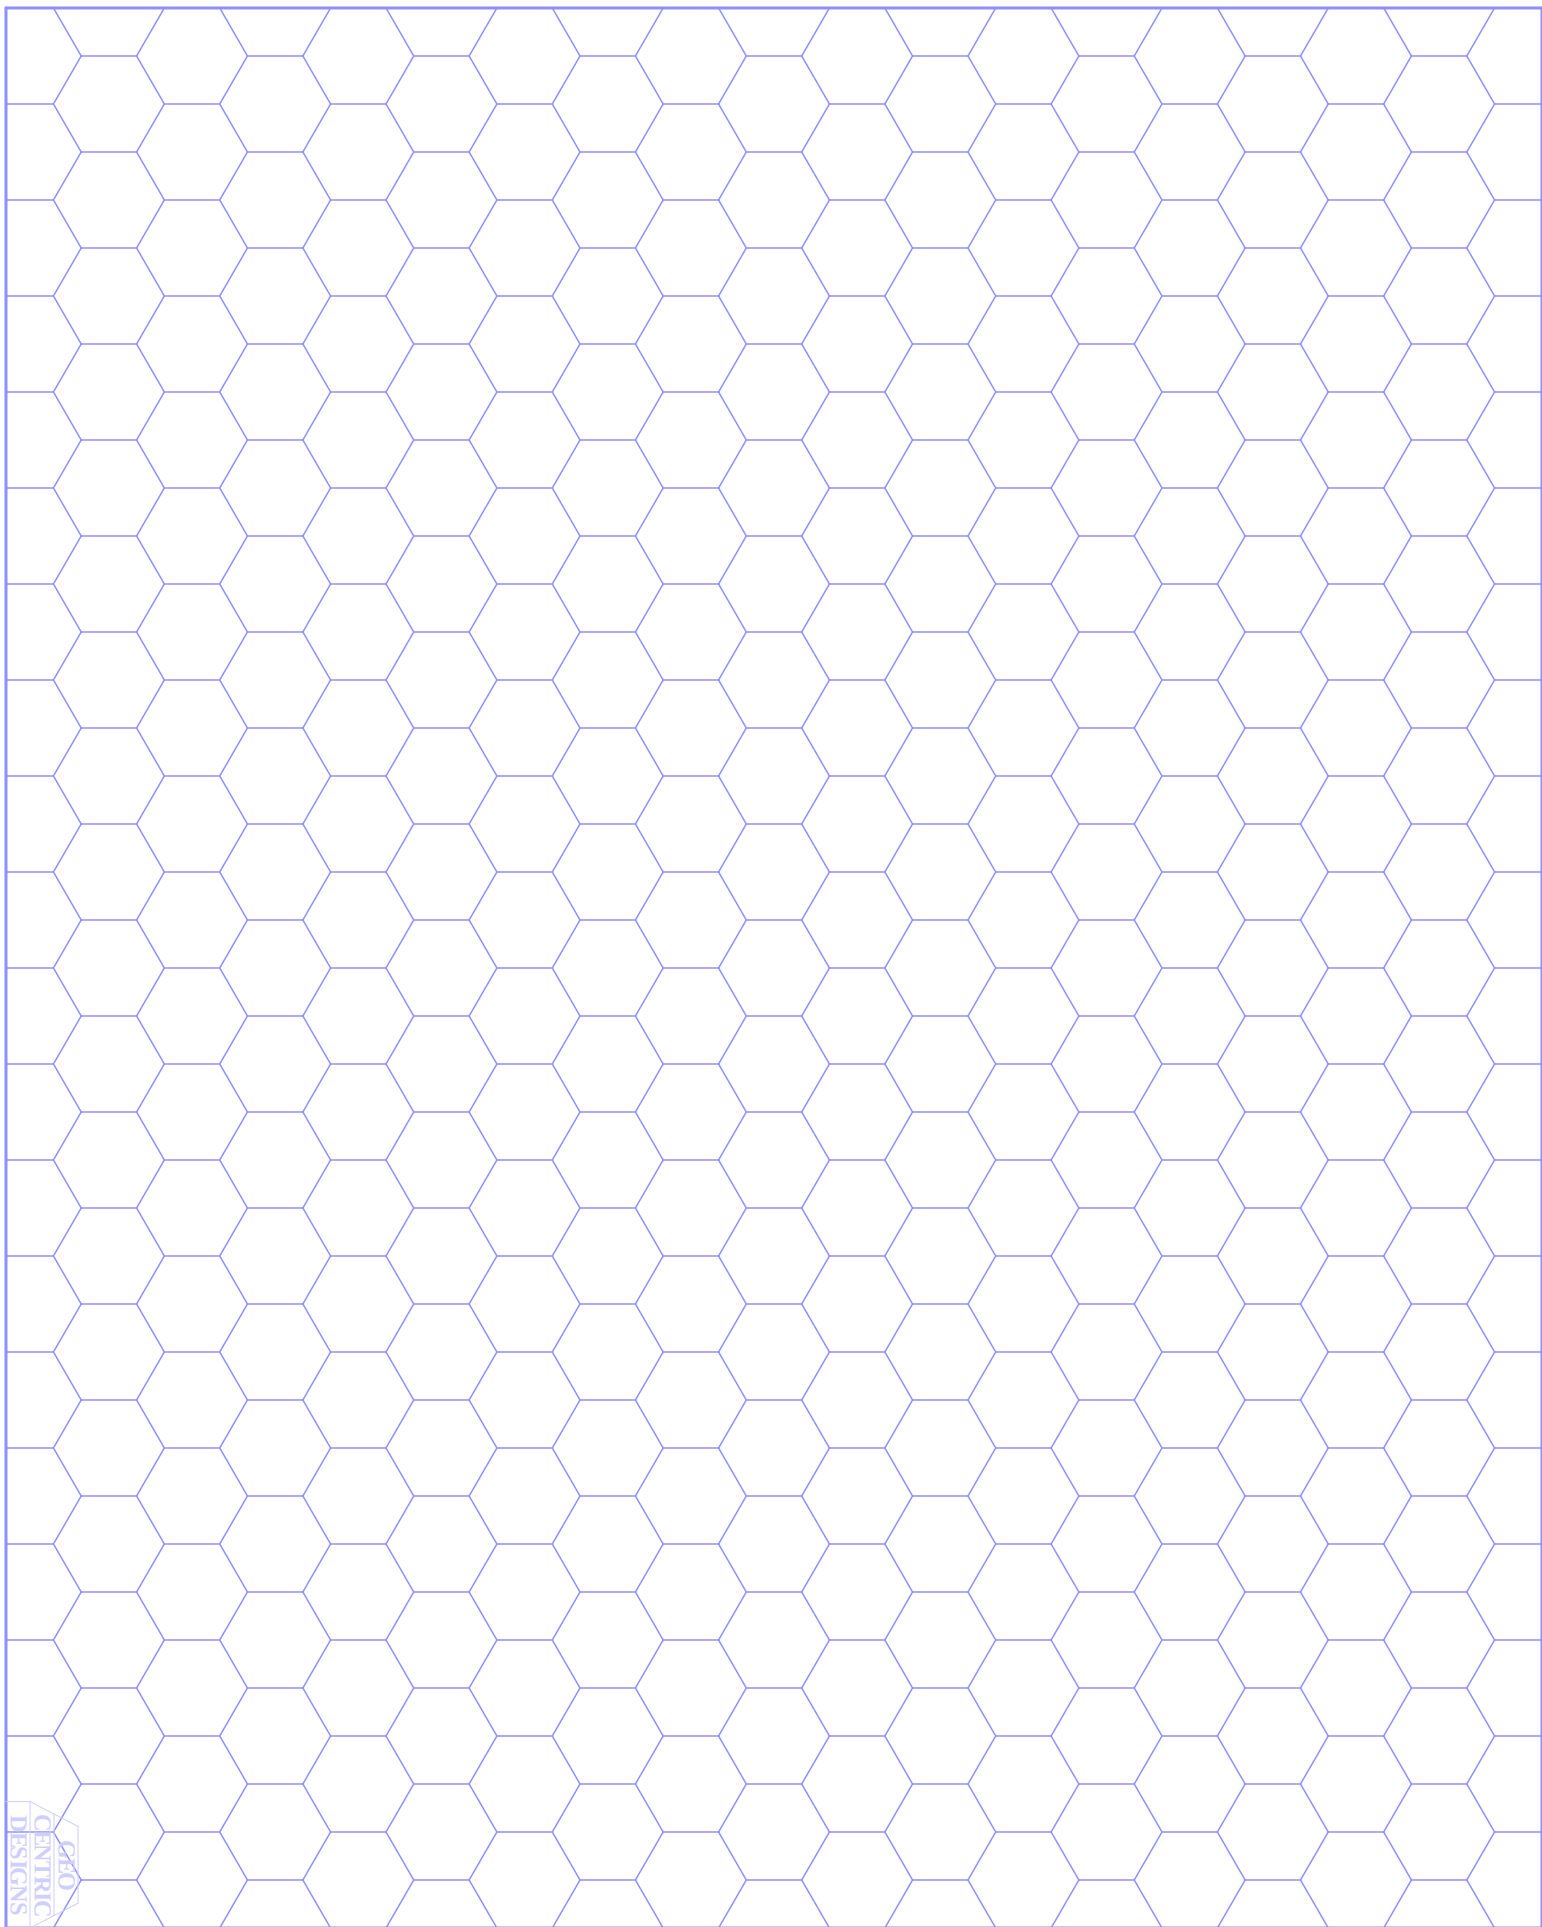

Thanks,
- GEO -
